

Finding the Launch Site

The directions below assume you first get to Gerlach NV, USA.

(A) *Gerlach NV - [40 39.127°N 119 21.363°W](#)

Use Google maps of other navigation to get here first. After this use NV country road 34 to get to the 12 mile Playa entrance.

(B) *12 MI Entrance - [40 46.334°N 119 15.756°W](#)

This is the best entrance to use to get to the site. Drive straight in and to the NE. There is a bumpy intersection that goes to the Burning Man site, do NOT turn right! There will be road signs with rockets on them marking the correct road to take. The speed limit is 20 MPH for safety to the Burning Man cleanup crew and to keep the dust down. The road will go about 1 mile in and start a gentle bend to the NNE. This takes us to the next way-point 1.4mi in.

(C) *West Road Bend - [40 47.108°N 119 14.524°W](#)

This is the center of the bend more to the NNE. After this it will straighten out and you drive up to the next point 3.5 mi NE.

(D) *Turn East to launch site - [40 49.572°N 119 12.167°W](#)

*This is supposed to be at the location where the double pylon marker is in the road, and the tire. At this point we drive about to the NE 4.4 miles directly to the Aeropac location.

(E) *Aeropac Launch Site - [40 52.241°N 119 6.417°W](#)
