

Finding the Launch Site

The directions below assume you first get to Gerlach NV, USA.

(A) *Gerlach NV - [40 39.127'N 119 21.363'W](#)

Use Google maps or other navigation to get here first. After this use NV country road 34 to get to the 12 mile Playa entrance.

(B) *12 MI Entrance - [40 46.334'N 119 15.756'W](#)

This is the ONLY approved entrance to use to get to the site. DO NOT USE ANY OTHER ENTRANCE. From the 12 mile entrance drive straight in and to the NE. There is a bumpy intersection that goes to the Burning Man site, do NOT turn right! The road will go about 1 mile in and start a gentle bend to the NNE. This takes us to the next weigh-point 1.4mi in.

(C) *West Road Bend - [40 47.108'N 119 14.524'W](#)

This is the center of the bend more to the NNE. After this it will straighten out and you drive up to the next point 3.5 mi NE.

(D) *Turn East to launch site - [40 49.572'N 119 12.167'W](#)

*This is supposed to be at the location where the double pylon marker is in the road, and the tire. At this point we drive about to the NE 4.4 miles directly to the Aeropac location.

(E) *Aeropac Launch Site - [40 52.241'N 119 6.417'W](#)

When you get out there we should be at least close to this point depending on the local playa conditions. We will be within easy eyesight.
